“The continued shift to a circular economy is set to require considerable investment in new recycling and reprocessing capacity in the UK. The government’s Resources and Waste Strategy for England, published in December 2018, sets out a number of measures which aim to increase investors’ confidence and improve the competitiveness of the reprocessing industry.”

– **Claudia Preedy, B2B Analyst**

This report looks at the following areas:

- Government plans to tackle plastic and packaging waste and boost stagnating recycling rates
- Separate food waste collection schemes key to boosting household recycling rates

### DID YOU KNOW?

This report is part of a series of reports, produced to provide you with a more holistic view of this market

# Waste Management and Recycling - UK - April 2019

Report Price: £995.00 | \$1343.55 | €1119.77

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

## Table of Contents

### Overview

What you need to know  
Covered in this Report

### Executive Summary

#### Waste arisings

Total waste generation continues to grow, but individual sectors show varying trends

Figure 1: Waste arisings in the UK, by sector, 2013-18

#### Waste collection

Recycling accounts for 17% of total waste management budgets in 2017/18

Figure 2: England budget revenue expenditure on waste management, net current expenditure, 2017/18

#### Waste treatment

Shift from landfill disposal towards recycling and incineration with EfW

Growth in new EfW capacity likely to slow

Landfill represents just 12.5% of waste treatment in 2017/18

Figure 3: Local authority collected waste treatment, England, '000 tonnes, 2013/17-2017/18

#### Companies and brands

Consolidation remains key theme in industry

What we think

### Issues and Insights

Government plans to tackle plastic and packaging waste and boost stagnating recycling rates

The facts

The implications

Separate food waste collection schemes key to boosting household recycling rates

The facts

The implications

### The Market – What You Need to Know

Dry recycling makes up just over a quarter of household waste

Recycling rates in England have stalled since 2013

Incineration with EfW accounts for 41% of municipal waste treatment

Rising landfill tax drives rapid decline in waste disposed to landfill

### Waste Arisings

Total waste generation continues to grow, but individual sectors show varying trends

Figure 4: Waste arisings in the UK, by sector, 2013-18

#### Construction output

Figure 5: UK construction output, 2014-18

#### Household waste
