

Mobile Phones - US - March 2019

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"The US mobile phone industry is well established, with more than 100 million units sold annually for more than five straight years. However, sales growth has slowed, as the majority of consumers have already migrated from feature phones to smartphones, and now need additional impetus to upgrade."

- **Buddy Lo, Senior Technology Analyst**

This report looks at the following areas:

- Market size and forecast of mobile phone sales in the US
- Smartphone purchase intent within the next two years
- Smartphone brands owned and considered
- Smartphone accessories used
- Attitudes toward smartphones

Mobile Phones - US - March 2019

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Figure 13: Mobile phone ownership and type of phone used (among internet users), 2011-18

Figure 14: Smartphone users, by household income (among internet users), 2012-18

Market Perspective

- Impact of 5G on mobile devices is still too early to determine
- 5G rollout could link network providers with specific brands
- More than half of US households no longer have access to a landline
- Apple replaces nearly 11 million iPhone batteries in 2018

Market Factors

- Trade disputes bring uncertainty and potential price increases
- Political pressure limits Huawei's presence in the US
- Refurbished second-hand market can impact new phone market
- Figure 15: Sprint iPhone X upgrade retention email, December 2018
- Figure 16: Apple iPhone Xr upgrade retention email, part 1, December 2018
- Figure 17: Apple iPhone Xr upgrade retention email, part 2, December 2018

Key Players – What You Need to Know

- Apple's iPhone still the king of the hill
- Apple and Samsung top repeat consideration among current owners
- Mobile gaming ready to take the next step
- Chinese companies like Huawei face political hurdles in US

Company and Brand Market Share of Mobile Phones

- Apple iPhone user market share growth stops in 2018
- Figure 18: Brand of smartphone, by mobile phone users, 2012-18

What's Working?

- Apple has the most loyal smartphone owners
- Google garnering significant interest among smartphone shoppers

What's Struggling?

- Apple will no longer report unit sales on iPhones
- Alternative non-carrier brands get little to no consideration

What's Next?

- 5G technology will refresh buying demand
- Foldable touchscreens begin to enter the market
- Figure 19: Video of Royole Flexpai demo at CES 2019, January 2019
- Mobile gaming could attract a new type of gaming consumer to the smartphone market
- Smart home products, accessories could impact smartphone purchasing

The Consumer – What You Need to Know

- Apple commands majority of the market
- High accessory usage correlates with purchase intent
