

# The Golf Consumer – US – November 2012

## Scope and Themes

*“The golf industry is challenged to grow participation—or at least to stem the exodus of players. The steady decline in the number of golfers has manifested in a reduction in the number of golfing facilities, annual rounds played, declining golf equipment sales revenue, and declining golf/country club memberships. While the recession of 2007-09 can be blamed for some of the losses, the downward trend in the market has been evident since the early 2000s. In addition to cost being a barrier, the length of time it takes to play, a lack of ability/confidence, competition from other sports, and a persistent image problem all serve to drive down participation.”*

– Fiona O’Donnell, Senior Lifestyles & Leisure Analyst

## In this report we answer the key questions:

- **Can golf ever really be an affordable leisure option for the less affluent?**
- **Should traditional 18-hole courses be modified to allow access for time-crunched players?**
- **Are today’s courses beyond the skill level of the average player?**
- **What is the industry doing to stem the loss of players and engage new ones?**

Participation in golf has been steadily declining since its peak in 2003. While the economic recession foots some of the blame, the fact that annual rounds had been declining prior to the downturn indicates a loss of interest in the sport itself. As with most leisure activities, a lack of money and time are most often cited as reasons for not playing the game and, even with an improving economy, golf continues to be a relatively expensive sport requiring a substantial investment of leisure time.

Golf course design evolved throughout the 1990s to meet anticipated demand from serious golfers (and aging Baby Boomers) who wanted to be challenged by PGA Tour-like

## The Golf Consumer – US – November 2012

### Scope and Themes

courses. During the boom years of golf course development, courses became longer and more difficult. Now, it appears that the game must evolve once again if it is to attract a new breed of recreational, casual golfers who do not aspire to join the Tour, but rather enjoy the social and physical benefits of the game.

Industry players have noted the loss of participation and have launched programs to target the nontraditional golfer (women, younger adults, kids, and minorities), though as participation continued to slide through 2011, these do not yet appear to have been successful. However, 2012 may be the year that the pendulum swings positive for golf. Golf equipment sales are up for the first time in five years, and year-to-date rounds of golf played are up compared with 2011.

For the purposes of this report, Mintel has used the following definition for its discussion of the market for golf equipment:

- Golf clubs of any kind including putters, drivers, irons, sand wedges, hybrids, etc.
- Golf balls
- "Soft" goods, such as golf bags, gloves, and shoes.

Specifically excluded from the definition are golf vehicles of any kind, course fees and club memberships, golf lessons, golf apparel, tees, and training aids of any kind such as instructional videos, books, and other golfing-related publications. Antique or second-hand equipment of any kind is also excluded.

*What we think*

### ISSUES IN THE MARKET

*Can golf ever really be an affordable leisure option for the less affluent?*

*Should traditional 18-hole courses be modified to allow access for time-crunched players?*

*Are today's courses beyond the skill level of the average player?*

*What is the industry doing to stem the loss of players and engage new ones?*

### INSIGHTS AND OPPORTUNITIES

*Golf rounds, equipment revenues increase for first time since 2006*

*Innovative formats and programs may attract new players to the game*

*Social media can be used to target key consumer base and fill tee times*

*Score cards can be used to market, connect, and inform*

*Look to the East*

### TREND APPLICATION

*Inspire Trend: Snack Society*

*Inspire Trend: Why Buy*

*Inspire 2015 Trends*

*Old Gold*

### MARKET TRENDS

*Key points*

*Number of golfers has declined by nearly 5 million from 2003-11*

Figure 14: Number of golfers in the U.S., 2000-11

Among participants, share of core golfers is shrinking

Figure 15: Golfer population trends, by type, 2005-11

*Rounds of golf played annually has been declining since 2007*

Figure 16: Number of rounds played in the U.S., 2000-11

*Golf course openings and closings reflect demand and economy*

Figure 17: Golf course openings, 1985-2011

Figure 18: Golf course closures, 2001-11

Net growth in golf facilities has been negative since 2006

Figure 19: Net growth in golf facility supply, 2001-11

Mosaic segments, January 2011-March 2012

*Nearly one third of boys aged 12-14 have played golf in the past year*

Figure 33: Played golf in the last 12 months, by teens' gender, age, and by gender and age, April 2011-June 2012

*Kids aged 9-11—particularly boys—are the most likely golf players*

Figure 34: Played golf in the last 12 months, by kids' gender, age, and by gender and age, April 2011-June 2012

### COMPETITIVE CONTEXT

*Other sports compete with golf for consumers' leisure time*

Figure 35: Playing other sports as a reasons for not playing golf, by interested non-golfers, lapsed golfers, and those who have never golfed, July 2012

*Golf players participate in a variety of sports*

Figure 36: Sports participation in the last 12 months, by all and by golfers, April 2011-June 2012

### SEGMENT PERFORMANCE

#### SEGMENT OVERVIEW

*Key points*

*All segments of the golf equipment market increased from 2010-12*

Figure 37: Total U.S. retail sales of golf equipment at current prices, segmented by type, 2010 and 2012

*Segment forecast through 2017 indicates cyclical nature of the market*

Figure 38: Total U.S. retail sales and forecast of golf equipment at current prices, by segment, 2007-17

#### SEGMENT PERFORMANCE—GOLF CLUBS

*Golf clubs are the largest segment, 10% growth expected for 2012*

Figure 39: Total U.S. retail sales and forecast of golf clubs at current prices, 2007-17

#### SEGMENT PERFORMANCE—GOLF BALLS

*Golf ball sales decline 2007-11, recovery expected for 2012*

Figure 40: Total U.S. retail sales and forecast of golf balls at current prices, 2007-17

#### SEGMENT PERFORMANCE—GOLF SHOES

*Shoe sales in 2012 expected to grow more than any other segment*

Figure 41: Total U.S. retail sales and forecast of golf shoes at current prices, 2007-17

#### SEGMENT PERFORMANCE—GOLF GLOVES AND BAGS

*Golf glove sales likely driven by replacing high-quality gloves*

Figure 42: Total U.S. retail sales and forecast of golf gloves at current prices, 2007-17

*Golf bag sales likely tied to consumer confidence and economy*

Figure 43: Total U.S. retail sales and forecast of golf bags at current prices, 2007-17
