

Shopfitting (Industrial Report) - UK - June 2014

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"Shopfitters will be heartened by economic indicators at the start of 2014, which suggest improved market conditions, though growth in demand is expected to be unevenly split across retail sectors."
– Ben Harris, Industrial Analyst

This report looks at the following areas:

- What is the balance between refurbishment activity and new store fit-out in the UK and how is this likely to change moving forward?
- How are retailers' actions affecting the price level in the shopfitting industry?
- What retail sectors will offer the most new business opportunities over the coming year?
- What trends in retail store environments will affect shopfitters in the next five years?
- What factors are influencing retailers' decisions on shopfitting investment?

The shopfitting market includes a wide range of products and services that are used in the fitting out of predominantly, but not exclusively, retail establishments. The market involves a wide variety of skills and products, the majority of which are also utilised in other market sectors in the construction industry. These include the production and installation of:

- internal wall cladding
- windows and doors
- raised access flooring
- suspended ceilings
- shop facias
- signs
- lighting
- shelving
- electronic point of sale equipment
- floorcoverings
- counters and furniture
- dressing rooms
- electronic display equipment
- heating and ventilation equipment

The requirements of shopfitters depend largely on the sector involved, and specialist work is often subcontracted out to non-shopfitting specialists.

Shopfitters typically offer design facilities, although specialist designers and architects, who have no in-house production or installation facilities, and the work of specialist non-shopfitting companies are beyond the confines of this report.

Market Factors

- Key points
- Market factors
- The economic environment
- Retail industry performance
- New store construction
- Planning regulations and related legislation

Market Size

- Key points
- Market size
- Contraction in 2013 as store upgrade activity stalls
 - Figure 6: UK market for shopfitting, 2009-13
- Technology and large retailer purchasing power affecting prices
- Food retail demand strong while value retailers increase store presence

Market Trends

- Key points
- Market trends
- Budget retail premises grow at expense of local shops
 - Figure 7: Change in number of retail outlets in the UK, by sector, 2012-13
- Shopfitting complexity increasing as in-store experience grows in importance
- Business rate relief extended to retailers
 - Figure 8: Business rate multipliers, in England, 2008-13
- London retail outlets grow while the rest of the UK declines
 - Figure 9: Change in number of retail outlets in the UK, by region, 2009-13
- Retail construction stronger in Q3 and Q4
 - Figure 10: Seasonality of retail construction output, 2009-13

Supply Sources

- Key points
- Production
 - Figure 11: UK production of wooden furniture for shops, 2008-12
- Imports
 - Figure 12: UK imports of wooden furniture for shops, 2008-12
- Exports
 - Figure 13: UK exports of wooden furniture for shops, 2008-12

Industry Structure

- Key points
- Industry development
- Declining revenues lead to high profile industry insolvencies
