

## Occupational Health (Industrial Report) - UK - July 2014

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"The aftermath of the financial crisis had a contrasting impact on the occupational market. On the one hand, employees feared for their employment status as companies sought to cut costs by making redundancies, reducing absentee rates."

- Lewis Cone, Research Analyst

### This report looks at the following areas:

This report covers the UK occupational health market. Occupational health is defined as healthcare provision provided in the workplace and includes both specific health and safety care and broader issues of health, fitness and preventative health care, often referred to under the heading of wellness. It remains the case, however, that a feature of the sector is the lack of a clear definition and understanding of what constitutes occupational health. Effectively, occupational health comprises health services to employees that are paid for by the employer.
