

Underground Pipes (Industrial Report) - UK - November 2014

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"The separate aspects of the underground pipes market are subject to very different influences, including the long-term spending plans of utilities, where years of under investment continues to be addressed; the highly variable construction market, which tends to exaggerate overall economic vagaries; and political policy and public spending activity."

— Terry Leggett, Senior Analyst

This report looks at the following areas:

The UK market for underground pipes will demonstrate strong annual growth over the next few years, reflecting the combined effects of utilities' expenditure plans and the improving economy increasing construction-related demand. However, demand is likely to decline in 2015 before returning to growth in 2016 due to the expenditure plans of key sectors.
