

Mechanical and Electrical Engineering - UK - September 2016

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Just as the M&E sector was recovering from the prolonged difficulties of the recession and starting to see price pressure ease, uncertainties over the construction market resurfaced following the Brexit decision. This is encouraging companies to increasingly concentrate on maintenance contracts, the more stable aspect of the market.”

– Terry Leggett, Senior Analyst

This report looks at the following areas:

- What is the likely impact of Brexit?
- How does M&E relate to the facilities management sector?
- What about M&E prices?

The M&E sector now faces a new challenge: the impact of Brexit. Having started to enjoy growing demand as construction activity and consumer/business confidence was restored following a prolonged recession, the sector now faces economic uncertainty and delayed investment decisions. There remain, however, opportunities to drive the sector forward, including renewed government commitment to infrastructure projects, and the potential for maintenance contracts in uncertain conditions.
