

## Solar Panels - UK - September 2016

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

image

“The latest government cuts have already proved hugely damaging to the UK solar PV sector, which has seen deployment levels plummet during the first half of 2016. The Solar Trade Association estimates that a third of all solar jobs have been lost since July 2015, with a large number of installers going insolvent or leaving the market.”

– **Claudia Preedy - B2B Analyst**

This report looks at the following areas:

- What is the potential impact of Brexit on the UK's renewable energy policy and the solar PV sector?
- How can solar companies survive these turbulent times following the latest government policy reset?
- With cost-efficient energy storage solutions seen as the 'holy grail' of the solar PV market, what are the current market and technological developments in that area?

### DID YOU KNOW?

This report is part of a series of reports, produced to provide you with a more holistic view of this market

# Solar Panels - UK - September 2016

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

## Table of Contents

### Executive Summary

The market

UK Solar PV capacity reaches almost 11GW in mid-2016, but deployment drops in first half of 2016 following government subsidy reset

Figure 1: Development of Photovoltaic Installations in the UK, 2010-16

Uptake of solar PV in residential sector plummets in 2016 following FIT cuts

Figure 2: Residential Photovoltaic Capacity Installed in the UK, 2010-15

RO supported ground-mounted installed capacity reaches 5.2 GW in mid-2016

Commercial roof-top sector shows strong growth potential, but more supportive government policies are required to enable meaningful development

Industry needs to prepare for future without government financial support

Figure 3: Forecast new photovoltaic capacity installed in the UK, 2016-20

Market factors

### Key Insights

What is the potential impact of Brexit on the UK's renewable energy policy and the solar PV sector?

How can solar companies survive these turbulent times following the latest government policy reset?

With cost-efficient energy storage solutions seen as the 'holy grail' of the solar PV market, what are the current market and technological developments in that area?

## Market Factors

### Key points

Government policy

Renewable energy and climate change policies

Brexit vote raises uncertainties for renewables industry, although government remains committed to tackling climate change

Government slashes financial support as costs of solar PV are coming down, resulting in contraction of industry

Renewable Energy Obligation (RO) and Contracts for Differences (CFDs)

Feed-in tariff

Solar PV industry hit by further drastic FIT cuts in February 2016

Figure 9: UK Feed in Tariff Levels, July 2016-September 2016

### Forecast

#### Key points

##### Overview

##### Government Policy

STA publishes FIT reform proposals for rooftop solar

Rise in business rates threatens economic viability of commercial rooftop PV

##### Market trends and drivers

Installers need to diversify and become 'smart contractors' to drive future business post FIT

Installers are diversifying into new technologies and markets

Energy storage seen as "holy grail" of solar PV sector

Largely untapped commercial sector to provide strongest growth potential for solar PV deployment

In 2016, Lightsource has already reported some PPA success -

New London mayor pledges to support rooftop solar across capital

Utility sector also offers opportunities for solar firms
