

The Financial Lives of College Students - US - January 2017

Report Price: £3239.54 | \$3995.00 | €3796.74

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"College students are typically just beginning their financial journey into adulthood. Their key financial behaviors are not yet established, and they are still looking for a more traditional banking experience. While interested in technology, mobile banking is still not the main method of bank transactions for college students."

Jennifer White Boehm, Associate Director - Financial Services

This report looks at the following areas:

- Student loan debt continues to rise
- Those under 25 are outspending their earnings
- Students are concerned about making enough to live on their own
- Portion of students do not feel appreciated by the financial services industry

Definition

This report focuses on the financial behaviors college students aged 18-23, as well as their attitudes towards money and finances.

For the purposes of this Report, Mintel has used the following definitions:

A college student is defined as one who is aged 18-23, enrolled full time or part time in a 2-year or 4-year college or university and may live on or off campus or attend classes online.
