

Consulting Engineers - UK - July 2017

Report Price: £995.00 | \$1288.43 | €1182.46

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Despite ongoing economic and political uncertainty, consulting engineers’ fees income is expected to demonstrate continued growth over the next five years. Global challenges, such as population growth, climate change and urbanisation, together with the potential offered by rapidly evolving technology, will offer growth opportunities.”

– Claudia Preedy – B2B Analyst

This report looks at the following areas:

- How has the market for UK consulting engineers performed over the last five years?
- What is the impact of the legislative/regulative environment on individual sectors?
- Which sectors will provide the strongest growth potential for consulting engineers over the next five years?
- How have individual key companies in the industry fared during the last five years?

In the UK, transport and energy infrastructure projects are set to drive demand for consulting engineers over the next five years. However, in light of ongoing Brexit negotiations, which could delay some infrastructure projects, the current outlook carries a considerable degree of uncertainty.

The government’s ability to drive the economy forward in the post Brexit era will be integral to securing the necessary funding and achieving growth ambitions for infrastructure development in the UK. The government’s recently published National Infrastructure and Construction Pipeline and Funding and Finance Supplement will hopefully help by highlighting investment opportunities and inspiring investor confidence.

DID YOU KNOW?

This report is part of a series of reports, produced to provide you with a more holistic view of this market

Consulting Engineers - UK - July 2017

Report Price: £995.00 | \$1288.43 | €1182.46

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Table of Contents

Executive Summary

The market

UK consulting engineers' fees income up by an estimated 4% in 2016

Figure 1: Total fees rendered by UK consulting engineers, by sector, 2012-16

Road and rail remain most important areas for consulting engineers' fees income

Demand in power and energy sector driven by renewables projects

Market for UK consulting engineers anticipated to grow by 20% in real terms between 2016 and 2021

Figure 2: Forecast market for UK consulting engineers, 2017-21

Demand structure

Ambitious government plans for UK transport infrastructure investment to offer strong opportunities for UK consulting engineers

Transition to low carbon economy drives demand in power/energy sector

Figure 3: Forecast market for UK consulting engineers in the power and energy sector, 2017-21

Shift in focus from capital investment towards asset maintenance in water and sewerage

Commercial and industrial construction impacted by Brexit-induced uncertainty

Figure 4: Forecast UK market for consulting engineers in the transport sector, 2017-21

Companies

What we think

Key Insights

What are the likely implications of the referendum to withdraw from the EU for UK consulting engineers?

What are recent government efforts to help deliver a long-term infrastructure strategy?

What are the top priority infrastructure projects the government needs to press on with?
