

Computer Security - UK - January 2018

Report Price: £995.00 | \$1343.55 | €1119.77

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Computer security is an issue for consumers, SMEs, enterprises, and the public sector. It affects anyone who uses any internet-connected device, or indeed anyone who does any transaction with an organisation that has an internet-connected device. Few people fall outside of this definition, with the issue increasingly ranging from national security to every aspect of society.”

– Terry Leggett, Senior B2B Analyst

This report looks at the following areas:

- How will the computer security market develop over the next five years and what will be the impact of the Internet-of-Things?
- How will the government’s Cyber Security Strategy affect the market?
- Which technologies and types of approach to computer security will gain in importance?
- Will market growth be driven by the government and public sector, by large enterprises or SMEs?
- How is the cloud and growth in e-commerce affecting the market?
