

Construction - UK - April 2018

Report Price: £995.00 | \$1343.55 | €1119.77

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“The construction market has a reputation for being highly cyclical, and the prospect of a Brexit-induced economic slowdown suggested difficulties ahead. However, the sector covers a wide range of markets and some are very buoyant, highlighting increasingly polarised activity.”

– Terry Leggett Senior B2B Analyst

This report looks at the following areas:

- How will the construction market develop over the next five years?
- How is build-to-rent affecting markets?
- What will be the key market drivers?
- What sectors offer the best prospects?
- How are company strategies being changed to accommodate market developments?

Construction activity is becoming increasingly sector specific, with hot spots of growth such as housebuilding, while other sectors see moderating demand. Caution and delays to investment decisions in the industrial and commercial sectors are affecting overall demand amid the economic uncertainties created by Brexit, but infrastructure-based developments are being encouraged by government policy.
