B2B Economic Outlook - UK

“2021 has demonstrated a rapid recovery from the record fall in GDP in 2020 – in sharp contrast to the elongated flat recovery following the last recession. However, the huge uncertainties surrounding the outbreak of Omicron now dominate expectations for the economy. While the government clearly remains resistant to another ...

Lighting - UK

“LED lighting has fundamentally changed the lighting sector from a range of energy inefficient products such as incandescent lamps to modern, energy efficient lighting. Global demand, and international manufacturing subsidies have transformed prices. While the focus of world attention moves increasingly to climate change, that conversion will continue, but the ...
