Vehicle Recovery: Inc Impact of COVID-19 - UK

“The market for vehicle recovery is expected to suffer relatively minimal disruption from the COVID-19 pandemic. Assisted by the annual payment for most policies the sector is forecast to see recovery from 2021 helped by moves from many players in this market to move away from price competition and add ...

Consumers and the Economic Outlook: Inc Impact of COVID-19 - UK

“The UK is in the midst of its deepest recession on record. However, the recovery has already started, with monthly GDP growth in May and June. However, the winding down of state support for businesses presents renewed threats that could derail the recovery and is expected to lead to significant ...
