

December 2018**Utility Capital Expenditure - UK**

“The approach to infrastructure investment is in transition across the utility industry. Whereas spending in the past was mainly output-driven, investment is now more centred on innovation, higher efficiencies and long-term outcomes. The rising pressure from industry regulators to reduce costs for consumers is another challenge utility operators face.

Network ...

November 2018**Electricity Industry - UK**

“A key focus for distribution network operators is the development and roll-out of innovative smart grid technologies to support the growing clean energy capacity coming onto the grid and to help the transition to a more flexible energy system. According to government estimates, smart grids could also reduce the cost ...

October 2018**Renewable Energy - UK**

“Renewables are set to continue to play an increasingly important role in UK electricity supply, although the deployment of more mature technologies, such as onshore wind and solar PV, has slowed considerably amid reduced government support. However, with the costs of these technologies rapidly falling, together with the development of ...
