Solar Panels - UK

“With all government support now removed, the UK solar PV market is moving into a post-subsidy phase. While market conditions will remain challenging in the short term, there is optimism for strong growth to return to the subsidy-free UK solar PV market, reflecting falling costs in solar technology, innovation in ...

B2B Economic Outlook - UK

“The UK economy continues to show signs of slowdown, with GDP reversing slightly as a no-deal Brexit appears increasingly likely. Brexit-related uncertainty continues to hold back investment and confidence, but have so far only materialised as slower growth.

A no-deal Brexit is expected to have a major impact on the ...

Energy Industry - UK

“Battery technology and other forms of electricity storage solve the problem of renewables’ intermittent supply, and the technology is widely expected to have a significant role in the UK’s future energy system, allowing for an increased role for renewables, more flexibility and greater decentralisation.

The energy storage sector is already ...
