Utility Capital Expenditure - UK

“The business environment is in transition across the utility sectors, with the industry challenged by a changing regulatory environment, climate change, security of supply and uncertainties regarding future network requirements. These factors also influence the industry’s approach to capital expenditure.

Infrastructure investment will continue to be a key focus across ...

Electricity Industry - UK

“Suppliers have sought to differentiate tariffs in a number of ways, including by offering discounts for online account management and rewards such as gift cards. Recently, there has been an increase in tariffs that track wholesale price changes, and tariffs that allow energy to be purchased in bundles.

Suppliers are ...

Renewable Energy - UK

“Renewables are set to continue to play an increasingly important role in UK electricity supply, but the deployment of more mature technologies, such as onshore wind and solar PV, is currently slowing significantly amid reduced government support. However, with costs rapidly falling, more mature technologies are expected to experience a ...
