

# Automotive Retailing - Ireland - April 2021

Report Price: £1095.00 | \$1478.58 | €1232.31

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

## This report looks at the following areas:

- **Franchised new-car dealers** – those under contract to specific car manufacturers or importers.
- **Multi-franchise new-car dealers** – those with contracts that enable them to sell the products of more than one manufacturer.
- **Independents** – dealers that sell used vehicles from various manufacturers, some of which specialise in nearly-new or pre-registered cars.
- **Second-hand dealers** – those selling any make of used car, of any age.
- **Automotive auctions** – these are mainly used by motor dealers to buy their own stock, but some private individuals also purchase cars through auctions.

Seven in ten Irish consumers claim they could not survive without their car. This points to the importance of personal cars as a means of transport to Irish consumers, although over a third of drivers noted that environmental concerns have seen them use their car less.

Despite this concern for the environment, ROI consumers are more likely to not be interested in buying a diesel-engine car when next buying a car, while NI consumers are more inclined to opt for a petrol-engine car – suggesting that many Irish drivers are still to be convinced of the affordability and effectiveness of electric or alternative fuel vehicles.

COVID-19 has seen seven in ten Irish drivers note that they are driving less due to the virus, with the increased shift towards working at home likely to limit the need for cars among commuters.

“COVID-19 has hampered the ability of car retailers to operate, with lockdowns preventing operation, while shortage of materials has taken its toll on manufacturing globally. As the sentiment of Irish consumers improves as more become vaccinated and return to normal day-to-day life, this will likely help to drive the need for cars once again.”

– **Brian O’Connor, Senior Consumer Analyst**
