

# COVID-19 Impact on Technology: One Year Later - US - 2021

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

## This report looks at the following areas:

- General impacts of COVID-19 across lifestyles, the economy and household spending
- Technology hardware and communications segment performance and forecasts
- How COVID-19 accelerated the adoptions of new technologies and increased consumer reliance on technology
- Opportunities for tech brands to reach digital consumers based on their wants and needs, as well as attitudes toward technology

The COVID-19 pandemic has been a transformative event for consumers and technology. The importance of technology products and services became elevated to new levels. Remaining connected was a top priority for 44% of consumers who felt home internet was more important because of COVID-19. The impact of the pandemic on daily life also drove changes in consumers' digital behaviors and accelerated adoption of things like video chatting, gaming, streaming and ecommerce and spurred consumers to purchase new tech products for a more virtual lifestyle.

One of the biggest impacts of COVID-19 on consumers' technology behaviors – one year after the pandemic – has been the widespread shift to remote work for millions of employees, and how that shift is impacting consumer electronics and online services. Remote working is expected to remain a feature of employment arrangements and should drive further spending and participation in various areas of consumer tech and electronics. Mintel has observed levels of remote work nearly double since the pandemic, and the "new normal" of a digitally connected workforce will lead more consumers to seek innovations and tech solutions for the home and the home office.

"The pandemic has impacted almost every facet of consumers' lives, from their personal finances to their social lives, as well as priorities and behaviors."

- **Buddy Lo, Senior Technology and Consumer Electronics Analyst**

## Table of Contents

### OVERVIEW

- What you need to know
- This Report looks at the following areas
- Definition
- Market context
- Economic and other assumptions
- COVID-19: US context

### EXECUTIVE SUMMARY

- Top takeaways
- Market overview
- Impact of COVID-19 on technology and communication  
Figure 1: Short-, medium- and long-term impact of COVID-19 on technology hardware and communication services, June 2021
- Opportunities and challenges
- Remote work will continue to drive household tech purchases  
Figure 2: Impact of COVID-19 on technology, by work commute, February 2021
- Computer chip shortage will put pressure on the tech category to meet demand
- Consumers interested in new tech products for a variety of categories  
Figure 3: Categories for new technology, February 2021
- Shared spaces increase demand for personal audio products  
Figure 4: Hearable device ownership, by household size, February 2021

### COVID-19 PANDEMIC OVERVIEW

Figure 5: Daily trends in number of COVID-19 cases in the United States reported to CDC, Jan. 22, 2020-May 19, 2021

- January-March 2020: discovery and first wave  
Figure 6: Number of COVID-19 cases in the United States reported to CDC, by region, Jan. 22, 2020-May 19, 2021
- April-July 2020: uneven lockdown and uneven impact as cases climb  
Figure 7: COVID-19 cases in the United States reported to CDC, by age group, Jan. 22, 2020-May 19, 2021  
Figure 8: COVID-19 deaths in the United States Reported to CDC, by age group, Jan. 22, 2020-May 19, 2021

## MARKET FACTORS

- **Remote work nearly doubles since pandemic**  
Figure 43: Changes in work commute, February 2021
- **Major manufacturers scramble to overcome global chip shortage**
- **K-shaped economic recovery accentuates digital divide**
- **5G supports further innovation and connected potential**

## CATEGORY WINNERS AND LOSERS

- **Winners**
- **Smart home integration increases**  
Figure 44: Smart home device ownership, March 2020–April 2021
- **Wearable tech and health monitoring get a boost**  
Figure 45: Attitudes toward wearable technology – Healthcare, November 2020
- **Social media platforms see bolstered revenues in 2020**  
Figure 46: Social media advertising revenue, 2019–20
- **Losers**
- **Streaming takes on the theater industry**  
Figure 47: Total US revenue from box office admissions, at current prices, 2015–21  
Figure 48: US video streaming and rental spending, 2015–20

## MARKET OPPORTUNITIES

- **5G will expand mobile bandwidth capabilities for consumers**
- **Better internet for more devices at home**
- **Augmented reality poised for a breakthrough**

## THE CONSUMER – KEY TAKEAWAYS

- **Remote work is here to stay and so are the changes in behavior**
- **Two out of three parents balance both work and home life remotely**
- **Dependency on technology has increased due to COVID-19**
- **Hearable devices create a sound barrier for crowded households**
- **Consumers interested in new tech for variety of categories**
- **About one third of consumers are Tech Enthusiasts**

## IMPACT ON TELECOMMUTING

- **The WFH experiment breaks standard expectations of office work**
