

Consulting Engineers - UK - September 2015

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“The reform of the Highway Agency, now known as Highways England, should give contractors and consultants the confidence to recruit and train the skilled workers required to deliver the increase in transport projects over the coming years.”
– Claudia Preedy - B2B analyst

This report looks at the following areas:

- How has the market for UK consulting engineers performed over the last five years?
- How strongly will the market develop over the next five years?
- What is the impact of the legislative/regulative environment on individual sectors?
- Which sectors will provide the strongest growth potential for consulting engineers over the next five years?
- How have individual key companies active in the industry fared during the last five years?

The outlook for UK consulting engineers is expected to remain positive for the foreseeable future, with fees income anticipated to show continued growth over the next five years. In the UK, transport and energy infrastructure projects, which account for the vast majority of the current national infrastructure pipeline value, are set to provide the strongest growth potential. The return to stronger growth in the construction sector, particularly industrial and commercial building, will also be a key growth driver for UK consulting engineers.

DID YOU KNOW?

This report is part of a series of reports, produced to provide you with a more holistic view of this market

Consulting Engineers - UK - September 2015

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Table of Contents

Executive Summary

The market

UK consulting engineers' fees income up by a modest 1% in 2014

Figure 1: Total fees rendered by UK Consulting Engineers. By Sector, 2010-14

Government's renewed focus on infrastructure investment to provide a positive impetus for the sector

Road and rail most important areas for consulting engineers' fees income

Power and energy sector has offered strong opportunities for consulting engineers in recent years

Market for UK consulting engineers anticipated to grow by 21% between 2015 and 2019

Private sector to drive infrastructure investment growth

Figure 2: Forecast Market for UK Consulting Engineers, 2015-19

Demand structure

Transport to remain largest sector for consulting engineers

Transition to low carbon economy drives demand in power/energy sector

Figure 3: Forecast Market for UK Consulting Engineers in the Power and Energy Sector, 2015-19

Shift in focus from capital investment towards asset maintenance in water and sewerage

Development of industrial construction output to remain above GDP growth over the next five years

Figure 4: Forecast Segmentation of the Fees Rendered by UK Consulting Engineers in the Building Sector, 2015-19

Companies

What we think

Key Insights

How are plummeting oil prices impacting investment in the North Sea oil and gas infrastructure?

How will consultants and contractors benefit from the reform of the Highways Agency?

The energy sector is set to be a key driver for consulting engineering work over the coming years, but have any uncertainties in the sector's outlook started to emerge?

What is the outlook for consulting engineers in the water and waste water sector? What are the key challenges in the sector?
