

Data Centres - UK - May 2016

Report Price: £995.00 | \$1611.35 | €1263.96

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Exponential growth in data, set to further increase with the Internet of Things; continued migration to the Cloud; advances in communication speeds; ever advancing technology in computing power; and the trend to third-party outsourcing of non-core activities can only result in growing data centre demand.”

– Terry Leggett, Senior B2B Analyst

This report looks at the following areas:

- What are the driving forces for the data centre development?
- Will out of town developments challenge the early domination of city centre models?
- Will the sector continue to attract private equity funding?
- Will the fragmented sector increase in concentration?
