

Renewable Energy - UK - October 2017

Report Price: £995.00 | \$1321.06 | €1134.00

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Renewables are set to continue to play an increasingly important role in UK electricity supply, but the deployment of more mature technologies, such as onshore wind and solar PV, is currently slowing significantly amid reduced government support. However, with costs rapidly falling, more mature technologies are expected to experience a new wave of growth in a subsidy-free world.”

– **Claudia Preedy - B2B Analyst**

This report looks at the following areas:

- How do government policies shape the development of the renewable energy market?
- What is the potential impact of Brexit on the UK renewable energy sector?
- What is the product mix of renewable energy deployment?
- How have key players involved in the renewable energy sector performed in recent years?
- What is the anticipated future development of the renewable energy sector?

The terms of reference for this report concern the UK renewable energy market. This covers:

- Biogas from anaerobic digestion
- Biomass
- Hydro electric
- Tidal power
- Wind power
- PV cells
- Landfill gas
- Sewage gas
- Wave power

DID YOU KNOW?

This report is part of a series of reports, produced to provide you with a more holistic view of this market

Renewable Energy - UK - October 2017

Report Price: £995.00 | \$1321.06 | €1134.00

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Table of Contents

Executive Summary

The market

A quarter of the UK's electricity supply now comes from renewable sources

Figure 1: UK Renewable penetration of electricity supply, 2012-16

Solar PV overtakes onshore wind to become renewable technology with the largest installed capacity

Figure 2: UK Renewable energy market shares, by installed capacity, 2012 and 2017,

Renewed government commitment urgently needed to help drive renewables industry forward

Offshore wind dominates renewables development pipeline

Figure 3: Forecast renewable energy generation, 2016-35

Market factors

What we think

Key Insights

What is the potential impact of Brexit on the UK's renewable energy policy?

What is the current outlook for the UK solar PV market following the recent policy reset?

How is the offshore wind sector progressing in bringing down costs?

Renewable Energy - UK - October 2017

Report Price: £995.00 | \$1321.06 | €1134.00

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Key points

Government policy

UK Energy Policy

EU Renewables Directives

Climate Change Act 2008

New government policies urgently needed to achieve long-term emission reduction goals

Levy Control Framework

Renewable Energy Obligation (RO)

Early closures under the RO for solar PV and onshore wind

Feed-in-Tariffs (FITs)

Government commits to fresh FIT review before end of 2017

The Renewable Heat Incentive

Consultation and review of the RHI scheme

Electricity Market Reform (CfD and Capacity Market)

First CfD auction concludes in February 2015

Second CfD auction dedicated to pot two technologies

Second CfD auction winning bids dominated by offshore wind, which has seen a dramatic fall in costs

Market Size Overview

Key points

Overview

Figure 9: Analysis of electricity supplied in the UK, by type of fuel used in generation, 2011-16

Figure 10: UK renewable penetration of electricity generation, 2012-16

Figure 11: Renewable electricity generation in the UK, 2011-16

Figure 12: UK Renewable energy market shares, by installed capacity, 2012 and 2017

Wind Generation

Key points

Overview

Figure 13: UK onshore and offshore wind energy generation capacity, 2012 and 2017

Onshore wind

Early closure of RO for onshore wind

Onshore wind farms wing big in first CfD auction, but excluded from second auction in 2017

Small-scale onshore wind installations supported by FIT scheme

Figure 14: Cumulative FIT wind installations , 2017-17

Offshore wind

offshore wind farms operational in UK

UK is leading offshore wind market in Europe

Green Investment Bank to boost investment in offshore wind

Offshore wind sees significant cost reductions

Result of second CfD auction reveal further cost reductions of offshore wind

Forecast

Key points

The market

Government policy

New government policies urgently needed to achieve long-term emission reduction goals

Government slashes support for more mature renewable technologies, including onshore wind and solar PV

...But continues to back offshore wind, supported by rapidly falling costs

Upcoming Clean Growth Plan presents opportunity for government to set out long-term clean energy policies

Market prospects

Overview

Tentative signs of investor confidence returning in the UK renewables sector

Energy storage to play key role in transition to clean electricity supply system

BEIS and Ofgem set out plans for major upgrade of the UK's energy systems, including the removal of barriers to storage

Government unveils £246 million battery investment strategy in July 2017

Renewables capacity development pipeline

Figure 71: Renewables capacity development pipeline, as of August 2017

Figure 72: Forecast renewable electricity generation, 2016-35

Future potential energy mix

National Grid's Future Energy Scenarios

Consumer Power scenario:

Steady State scenario:

Two Degrees scenario:

Slow Progression scenario:

Figure 73: Annual power demand in Great Britain, 2017-42

Electric cars could fuel huge demand for power over the next 30 years

Electricity storage to increase, but at a more moderate levels than National Grid previously predicted

Future Potential Energy Mix

Renewables

Nuclear
