

Electricity Industry - UK - November 2017

Report Price: £995.00 | \$1321.06 | €1134.00

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Suppliers have sought to differentiate tariffs in a number of ways, including by offering discounts for online account management and rewards such as gift cards. Recently, there has been an increase in tariffs that track wholesale price changes, and tariffs that allow energy to be purchased in bundles.”

– **Claudia Preedy - B2B Analyst**

This report looks at the following areas:

- What are the key drivers for network investment in the electricity distribution sector?
- How do legislative changes affect the industry?
- What challenges does the transition to a low-carbon economy present to DNOs?
- What are the expenditure plans of individual DNOs for the current price control period RII0-ED1?
- What are the current market trends and issues in the electricity supply sector?

DID YOU KNOW?

This report is part of a series of reports, produced to provide you with a more holistic view of this market

Electricity Industry - UK - November 2017

Report Price: £995.00 | \$1321.06 | €1134.00

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Table of Contents

Executive Summary

Electricity distribution market

Figure 1: UK gross capital expenditure by the electricity distribution network operators, 2012/13-2016/17

Figure 2: Total expenditure allowance for RIIO-ED1 in Great Britain, by company, 2015/16-2022/23

Electricity supply market

Figure 3: Breakdown of average domestic electricity household bill, 2016

Market factors

DNOs subject to price controls set by industry regulator Ofgem

Decarbonisation of UK economy increases loads placed on distribution network

CMA energy market investigation

Energy retail market facing further government intervention, including price cap on SVTs

What we think

Key Insights

What challenges does the rapid rise in distributed generation pose for distribution network operators?

What is the outlook for the emerging electricity storage market?

Key decisions relating to energy storage contained in the report include:

What opportunities are offered by the widespread adoption of smart meters?

Electricity Industry - UK - November 2017

Report Price: £995.00 | \$1321.06 | €1134.00

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

...but many suppliers hike prices in early 2017, citing rising wholesale costs and the cost of delivering government policies
Competition largely focused on cheap fixed tariffs...

...but majority of households remain on more expensive standard variable tariff - reflecting a two-tier energy market
Figure 30: Average annual bill on SVT versus supplier's cheapest fixed tariff, by major supplier, July-September 2017

Independent suppliers are rapidly gaining market share

Figure 31: Domestic gas supply market shares in Great Britain, by company 2013-17

Figure 32: Domestic electricity supply market shares in Great Britain, by company 2013-17

Innovation in tariffs offerings

Suppliers focus on differentiating their offerings to stay ahead

Energy suppliers are branching out into multi-utility and home services markets

Customer service is a key driver of customer loyalty

Smart Meter Roll-out programme

First-generation (SMETS1) smart meters will need to be upgraded or replaced, as they can revert to being 'dumb' if consumers switch supplier

Potential benefits and opportunities offered by smart meters

Widespread adoption of smart meters will attract new market entrants, including tech firms

Smart meters and rise in small scale renewables and storage to open up opportunities for peer-to-peer trading, which would see consumers bypassing suppliers

Non-domestic retail market trends

Distribution Network Capital Expenditure

Key points

Capital expenditure

Figure 33: Breakdown of total expenditure by DNOs during DPCR5, by area 2011-15

Gross capital expenditure

Figure 34: UK gross capital expenditure by electricity distribution network operators, 2011/12-2016/17

Figure 35: UK gross capital expenditure by the electricity distribution network operators, 2012/13-2016/17

Figure 36: UK gross capital expenditure by the electricity distribution network operators, by company, 2012/13-2016/17

Figure 37: Total expenditure by electricity distribution network operators in Great Britain, by type, 2015/16

DPCR5 witnesses launch of Low Carbon Networks Fund

Recent years have seen rapid increase in distributed generation connected to DNOs' networks

Figure 38: Distributed Generation connected to the distribution network during DPCR5, 2011-15

Figure 39: Distributed Generation connected to the distribution network, 2015/16

Forecast expenditure

New price control framework based on Revenue = Incentives + Innovation + Outputs effective from April 2015

Forecast total expenditure

Figure 40: Actual total expenditure in 2015/16, totex allowance and forecasts for RIIO-ED1, by company

Ofgem slashes £200 million from RIIO-ED1 DNO spending allowances in September 2017

Figure 41: Total expenditure forecast for RIIO-ED1 in Great Britain, by company, 2015/16-2022/23
