

Consumers and Gadget Insurance - UK - November 2018

Report Price: £1995.00 | \$2693.85 | €2245.17

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“People want to keep their devices for longer and are keen to protect them. Gadget insurance has a strong case in a world of expensive, indispensable technology and sustainable-minded consumers. Simple, relevant products that provide clear value appeal to owners, but insurers also need to find a spot at the all-important moment of purchase.”

- Irene Salazar, Financial Services Analyst

This report looks at the following areas:

- **Extended warranties: right place, right time**
- **Keeping gadgets for longer: insurance and the sustainability angle**

Ownership and use of valuable portable devices continue to increase, but expensive price tags and market trends could result in a weaker appetite for regular upgrades. Consumers show a desire to keep their devices for longer and are looking to protect them. However, many consumers continue to neglect their insurance needs, putting their possessions at risk.
