

Cough, Cold, Flu and Allergy Remedies: Incl Impact of COVID-19 - US - April 2020

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"The COVID-19 pandemic has amplified the importance of illness management. Methods practiced during the outbreak are likely to hold lasting impact, such as staying home when sick and increasing illness prevention measures such as washing hands and using hand sanitizer."

– **Andrea Wroble, Health & Wellness Analyst**

This report looks at the following areas:

Americans' renewed focus on health and safety emphasizes the role of self-led, at-home treatment methods such as OTC medication to manage symptoms of common illness.

- **The impact of COVID-19 on consumer behavior and the cold, cough, flu and allergy category**
- **How consumer behavior toward illness management will shift post-COVID-19**
- **Consumer loyalty isn't bound to brand name**
- **How certain proactive wellness ingredients can boost category spending**

Allergy testing in retail health setting

The Consumer – What You Need to Know

- Nearly all adults experience common illness
- OTC treatments are the go-to solution, naturals are secondary
- Americans are individualistic when it comes to common illness
- Adults manage illness with self-led methods at the onset of symptoms
- When symptoms worsen, it's time to call the doctor
- Familiarity and perceived efficacy are most important

Ailments Experienced and Frequency

Common illness is universal among US adults

Figure 32: Ailments experienced in the past 12 months, January 2020

Allergy and illness symptoms occur most regularly

Figure 33: Frequency of ailments experienced in the past 12 months, January 2020

Allergies don't differentiate based on demographic

Figure 34: Regular incidence of allergies in the past 12 months, by various demographics, January 2020

Parents get germs from their little ones

Figure 35: Ailments experienced in the past 12 months, by children in the household, January 2020

Product Usage by Ailment Experienced

Cold, cough, flu and allergy ailments share treatment methods

Traditional OTCs offering multi-symptom relief are widely used

Natural remedies may struggle with perceived efficacy

A wellness focus could bolster consideration of naturally positioned products

Figure 36: Product usage by ailment experienced, January 2020

OTC remedies remain the go-to treatment solution

Figure 37: Product usage by ailment experienced – any ailment (net), January 2020

Naturally positioned remedies garner interest among young women

Figure 38: Product usage by ailment experienced – any ailment (net), by gender and age, January 2020

Natural remedy takers are open to proactive treatment methods

Figure 39: Product usage by ailment experienced – any ailment (net), by product usage, January 2020

Flu Shot Attitudes and Barriers

Flu shots are prioritized by half of Americans

The flu impacts many, but flu shots protect many more

Figure 40: Flu shot incidence, January 2020

Who is more likely than average to get a flu shot?

Pandemic puts the importance of vaccination in perspective

Seasonal flu getters seek protection from the flu shot

Figure 41: Frequency of ailments experienced in the past 12 months, by flu shot incidence, January 2020

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Help me help myself

Figure 42: Reasons for getting the flu shot, January 2020

Adults who don't get the flu shot are not easy to influence

Figure 43: Motivations to get a flu shot, January 2020

Ailment Management at the Onset of Symptoms

Simple, familiar methods act as initial illness defense

Self-treatment is preferred when symptoms first occur

Natural remedies have a place at the onset of symptoms

Figure 44: Ailment management at the onset of symptoms, January 2020

Young adults take less action at the onset of symptoms

Figure 45: Self-led treatment methods at the onset of symptoms – any rank, by age, January 2020

Ailment Management as Symptoms Worsen

Self-led treatment methods hold strong for severe symptoms

Adults still rely on OTC medication when symptoms worsen

Consumers are confident in their treatment approach for common illness

Figure 46: Ailment management as symptoms worsen, January 2020

Seeking medical attention increases with symptom severity

Figure 47: Physician interaction at the onset of symptoms vs as symptoms worsen, January 2020

Age differentiates physician interaction

Aging adults find comfort in visiting the doctor's office

18-24 year olds are a good target for immediate care facilities

Virtual visits skew toward 25-24 year olds

Figure 48: Physician interaction as symptoms worsen, by age, January 2020

Attitudes toward Recovery Remedies

Familiarity and trust are key for symptom management

The power of familiarity and trust cannot be replicated

Product claims and side effect profile are more impactful than brand name

Opportunity for immune system support to shift the market from reactive to proactive

Figure 49: Attitudes toward recovery remedies, January 2020

Attitudes toward recovery don't change when ailments occur

Figure 50: Ailments experienced, by attitudes toward recovery remedies, January 2020

Older adults want safety first

Figure 51: Select attitudes toward recovery remedies, by age, January 2020

Women avoid added side effects

Figure 52: Select attitudes toward recovery remedies, by gender, January 2020
