

Oral Health: Incl Impact of COVID-19 - US - May 2020

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

"During the COVID-19 pandemic, job and income loss have caused consumers to limit discretionary spending. Certain aspects of personal care are less important during shelter-in-place and therefore deprioritized. Maintaining oral care is considered an essential of daily health and hygiene, supporting consistent product usage throughout the outbreak and beyond."

– **Andrea Wroble, Health and Wellness Analyst**

This report looks at the following areas:

- **How the COVID-19 outbreak impacts consumer behaviors and the oral health products market as a whole**
- **How the market will fare in the post-COVID-19 slowdown**
- **Consumers' oral health behaviors and usage of products**
- **How consumer interest in oral health innovations will shift following COVID-19**
- **Impact of business closures and job loss on professional oral health services**

The oral care market is resilient because people perceive oral health and hygiene to be essential. As the lifestyle and financial impact of COVID-19 endures, US consumers will still purchase necessary personal care products to maintain a sense of normalcy and basic hygiene within the home. To avoid stores and crowded retail locations, adults may stock up on oral health products, strengthening category sales for the short term – but, the market will quickly stabilize once consumers have sufficient supply of what they need. Professional dental services will be impacted as well, due to business closures and the growing incidence of income loss affecting Americans.

Tapping into product attributes consumers value, such as expert guidance, naturally positioned ingredients and convenience claims, are still important, but brands must consider shifts in consumer routines following COVID-19 to maintain relevance.

Oral Health: Incl Impact of COVID-19 - US - May 2020

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

Older adults crave professional interactions, but will rely on at-home routines

Figure 12: Visited the dentist in the last six months, by age, March 2020

Cost is a barrier to dentist visits for low-income adults; higher unemployment likely to compound the problem

Figure 13: Visited the dentist in the last six months, by household income, March 2020

Figure 14: Selected unemployment indicators, seasonally adjusted, by age, May 2019, April 2020, May 2020

Figure 15: Motivations to visit the dentist more often, by age, March 2020

How a COVID-19 recession will reshape the oral health industry

Personal care category has maintained slow growth since last recession

Figure 16: Consumer spending on personal care products, annual, 2000-19 and Q1 2020

Low product innovation and economizing attitudes stagnated oral care sales during previous recession; reliance on at-home routines will keep market stable

Figure 17: U.S. FDMx sales and forecast of oral care products, at current prices, 2005-15

Traditional distribution channels will continue to be challenged

Secondary products may be challenged without dentist guidance

Figure 18: Influence of the dentist recommendations, by adults who receive personalized product recommendations from dentist/hygienist, March 2020

COVID-19: US context

The Market – What You Need to Know

Steady market offers steady performance

Toothpaste segment holds market share

Limited need to browse in-store supports online purchasing

Convenience is key for oral care innovations

Positioning oral care as a moment of “me time”

Preventive products will reach the growing aging population

COVID-19 income loss and business closures impact dentist visits

Market Size and Forecast

Historic and projected sales performance of oral health products

Figure 19: Total US sales and fan chart forecast of oral health products, at current prices, 2014-24

Figure 20: Total US retail sales and forecast of oral health products, at current prices, 2014-24

Market Breakdown

Toothpaste continues to drive the oral health market forward

Figure 21: Total US retail sales and forecast of oral health products, at current prices, 2014-19

Online and mass channels dominate as the primary destinations

Figure 22: Total US retail sales of oral health products, by channel, at current prices, 2017 and 2019

Market Perspective

Consumers are looking for more convenient oral care options

Oral care market focuses on niche claim categories

Figure 23: Oral hygiene, by leading claim categories, 2015-20

Figure 24: Colgate-Palmolive Smile for Good toothpaste launch – UK, January 2020

Market Factors

- Positioning preventive oral care to the aging population
Figure 25: Population aged 18 or older, by age, 2014-24
- Social distancing lessens the importance of appearance

Key Players – What You Need to Know

- Toothpaste with added health benefits
- Flossing segment benefits from growing aging population
- Colgate employs new strategy to boost sales
- Whitening products suffer from occasional use
- Celebrating healthy smiles brings opportunity
- Niche health focuses and sustainability will grow in oral health

Company and Brand Sales of Oral Health Products

- Toothpaste and floss segments support category growth
Figure 26: Multi-outlet sales of oral health products, by leading companies, rolling 52 weeks 2019 and 2020

What's Working

- Toothpaste brands dive into functional health ingredients
- Flossing segment gains momentum
Figure 27: Multi-outlet sales of floss and dental accessories/tools, by leading companies and brands, rolling 52 weeks 2019 and 2020

What's Struggling

- Colgate takes on new trends to bolster MULO sales
Figure 28: Multi-outlet sales of toothpaste, by leading companies, rolling 52 weeks 2019 and 2020
- Tom's of Maine dips as Hello heats up
Figure 29: Multi-outlet sales of Hello and Tom's of Maine toothpaste, rolling 52 weeks 2019 and 2020
- Whitening segment is stunted by occasional use
Figure 30: Multi-outlet sales of teeth whiteners, by leading companies and brands, rolling 52 weeks 2019 and 2020
- Figure 31: Moon oral care stain prevention wipes, January 2020

What to Watch

- Flossing segment is ripe for innovation
Figure 32: Frequency of using flossing products, by interest in select oral care product attributes, March 2020
Figure 33: Quip flossing tool, October 2019
- More adults see oral care as a component of self-care than a chore
- Redefining a healthy smile
Figure 34: Hello customers, September 2019
- Sustainability claims increase in importance
- Niche health focuses could build loyalty with consumer segments
Figure 35: Oral health concerns to improve or prevent, March 2020

Oral Health: Incl Impact of COVID-19 - US - May 2020

Report Price: £3254.83 | \$4395.00 | €3662.99

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

- Adults abide by the basics of oral care
- Professional guidance influences use of oral care products
- Leaning into the self-care occasion
- Oral health routines are rooted in prevention
- Functional needs are still essential
- Giving adults a reason to smile

Product Usage and Frequency

Multi-product oral health routines are universal

Figure 36: Product usage, March 2020

Majority of adults stick to the basics of oral care

Figure 37: Product usage, by frequency, March 2020

Natural toothpaste and whitening has vast reach with younger men

Figure 38: Consistent usage of natural toothpaste and whitening kits/strips, by gender and age, March 2020

Older adults consistently floss; young adults offer opportunity

Figure 39: Consistent usage of string floss, by age, March 2020

Influence of the Dentist

Majority of consumers prioritize visiting the dentist

Figure 40: Frequency of dentist visits, March 2020

Who regularly visits the dentist?

Older adults are focused on bettering oral care

Figure 41: Visited the dentist in the last six months, by age, March 2020

Employee-sponsored health insurance may provide discounted dental care

Figure 42: Visited the dentist in the last six months, by employment status, March 2020

High income lessens financial burden; cost is a barrier to low-income adults

Figure 43: Visited the dentist in the last six months, by household income, March 2020

Oral care confidence starts at the dentist office

Figure 44: Influence of the dentist, March 2020

Adults follow personalized recommendations

Figure 45: Influence of the dentist recommendations, by adults who receive personalized product recommendations from dentist/hygienist, March 2020

Lower price points would incentivize more frequent visits

Figure 46: Motivations to visit the dentist more often, March 2020

Added rewards and guidance motivate young consumers

Figure 47: Motivations to visit the dentist more often, by age, March 2020

Attitudes toward Oral Health Routines

Oral care is considered a component of self-care

Figure 48: Attitudes toward oral health routines, March 2020

Parents value convenience

Figure 49: Attitudes toward oral health routines, by parental status, March 2020
