

Juice and Juice Drinks - US - November 2013

Report Price: £2466.89 | \$3995.00 | €3133.71

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“While the category benefits from a health halo, the perception of high calories and sugar has stunted recent growth. More and more, health professionals are pointing to the dangers of juice consumption and encouraging moderation (or elimination), especially among children.”
– Beth Bloom, Food and Drink Analyst

This report looks at the following areas:

- What impact do sugar/sweeteners have on category participation?
- How can the category compete with other beverage offerings?
- How can the category respond to consumer demand for affordability?

Total US retail sales of juice and juice drinks declined by 4% from 2008-13 (12% when adjusted for inflation), reaching \$15.5 billion. While the category benefits from a health halo, assisting consumers with their intake of healthful fruit and vegetables, the perception of high price and high calories and sugar, along with the proliferation of competing beverages, have stunted recent growth.

Consumer demand for healthful foods is exploding. As discussed in Mintel's *Fruit and Vegetables – US, October 2013*, while fruit and vegetables exemplify healthy food, they suffer from a lack of innovation and poor perception of taste and convenience. Juice and juice drinks have the ability to meet the consumer need for flavor variety and convenience. However, the category struggles with a conflicting health image.

Some 34% of respondents to Mintel's custom consumer survey who do not drink or have reduced their consumption of products in the category say it's because they contain too much sugar. The juice drinks segment has outpaced the growth of the larger 100% juice segment in recent years, largely due to the expansion of reduced-calorie and reduced-sugar offerings, in addition to lower price points available. Future growth among 100% juice offerings may come from a growing interest in juicing. The expansion of juice offerings at foodservice could appear as a driver of retail sales, rather than a deterrent, as consumers look for an affordable means of mimicking the health qualities of fresh-squeezed offerings.

In addition to health profile innovation among product launches, flavor innovation can be seen. The expansion of vegetable varieties offers lower sugar and calorie counts. The introduction of tropical/exotic ingredients, such as mango, dragon fruit, and papaya (in addition to the continued popularity of products featuring coconut) may help to attract users interested in flavor variety and meet the taste preferences of the fast-growing non-White and Hispanic populations of the US.

Mintel forecasts the losses to stop in the near future as the market expands healthful, calorie- and sugar-conscious options. Future growth will depend on the category's ability to present its products as convenient and affordable alternatives to competing beverage options.

Frequent drinkers driven by health

Figure 69: Consumption occasion, by usage frequency*, September 2013

Consumers seek health in 100% juice, room exists for frozen innovation

Figure 70: Consumption occasion, by fruit juice and juice drink usage, September 2013

Purchase Decision

Key points

Natural products, low price, and discounts drive purchase

Men are drawn to low price, while women may be swayed by coupons

Figure 71: Purchase decision, by gender, September 2013

Functional benefits influence young juice shoppers

...while health concerns inform the purchase decisions of older shoppers

Figure 72: Purchase decision, by age, September 2013

Low price strongly influences low-income earning HHs

Figure 73: Purchase decision, by household income, September 2013

Consumption Barriers

Key points

Sugar, cost limit purchase

Figure 74: Reason for not purchasing or decreased purchase, by gender, September 2013

Health concerns limit use among older respondents

Figure 75: Reason for not purchasing or decreased purchase, by age, September 2013

Cost is a barrier for lower-income HHs, sugar/calories for higher earners

Figure 76: Reason for not purchasing or decreased purchase, by household income, September 2013

Attitudes Toward Sugar and Sweeteners

Key points

Nearly half of consumers don't care for added sugar

Figure 77: Attitudes toward sugar and sweeteners, by gender, September 2013

Older users concerned with sugar, younger wary of artificial sweeteners

Figure 78: Attitudes toward sugar and sweeteners, by age, September 2013

Consumers looking for low calories not as concerned with sweeteners

Figure 79: Attitudes toward sugar and sweeteners, by fruit juice and juice drink features, September 2013

Custom Consumer Group – Households with Children

Key points

HHs with children are prime audience for category participation

Figure 80: Juice/juice drink purchase, by presence of children in household, September 2013

HHs with children are prime audience for category participation

Figure 81: Juice/juice drink purchase, by parents with children and age, September 2013
