China is gradually progressing into an energy-saving, environmental-friendly and technology-driven economy in which mass industrial production is giving way to domestic consumption to act as the key growth engine. Ever-increasing disposable income and an optimistic economic outlook encourages Chinese consumers to spend more money in almost every sector of life.”

– Laurel Gu, Research Manager

This report looks at the following areas:

- Consumer spending in 2015
- Market dynamics: Mass markets vs niche markets
- Forecast for the next five years

Although the economy is slowing, people’s confidence has not been hugely impacted. Chinese consumers are continuously increasing their spending in almost every aspect of life, out of a desire for upgrading their living quality.

This has led China as a whole to become more of a consumption-driven economy. Increasing discretionary spending that can promote both physical and emotional well-being is expected to take the lead in the near future, as consumers will gradually move into healthier lifestyles with enriched leisure experiences.

This Report looks into the trends in China’s economic development and changes in consumers’ spending patterns. This includes spending in different market segments including in-home food and beverages, foodservice, beauty and personal care products, pharmaceutical products, clothing and accessories, home and household care products, technology and communication, and leisure and entertainment, transportation and holidays, as well as spending on housing and personal finances.

The Report also conducts in-depth consumer analysis under the scope of an evolving population structure, social and economic situation and retail environment. It can be relevant to market players in different industry segments as well as overseas players looking to invest in China. Marketers as well as advertisers can also benefit from a greater understanding of how to interact with Chinese consumers.

Winners in the next five years

Holidays

Leisure and entertainment

Trading-up in food and beverages

Figure 22: Fastest-growing market sectors, at current prices, by % growth, 2015-20 (est)

Slower growth sectors for the next five years

Alcoholic drinks

Foodservice

Home and household

Figure 23: Slower-growing market sectors, at current prices, by % growth, 2015-20 (est)

In-home Food

What you need to know

What we think

Rising food prices drive steady year-on-year growth

Figure 24: Chinese in-home food expenditure, 2010-15

Opting for more convenient and healthier food drives further growth

Figure 25: Best- and worst-case forecast for in-home food, at current prices, 2010-20

Winners for 2016

Losers for 2016

Key consumer findings
Consumers spend more on food for healthier diets
Treat food reveals opportunity to trade up
Natural ingredients and healthy processing methods are key attributes of healthy food

Foodservice (Eating out and Takeaways)

What you need to know
What we think
Demand for experiential consumption can outweigh the impact of the economic slowdown
Figure 26: Chinese foodservice expenditure, 2010-15

Eagerness for healthier diets will drive future growth
Figure 27: Best- and worst-case forecast for foodservice market, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Dining out is the number one leisure activity
Consumers are willing to invest for healthier diets, while seasonal and organic ingredients remain influential
Expanding into more non-mainstream dining period and snacking varieties

Non-alcoholic Drinks

What you need to know
What we think
Category structure changes towards healthier and category-blurring products
Figure 28: Chinese non-alcoholic drinks expenditure, 2010-15

Continuously increasing spending for healthy non-alcoholic drinks
Figure 29: Best- and worst-case forecast for non-alcoholic drinks, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Most consumers are keeping the same spending habit on non-alcoholic drinks
Figure 30: Changes in the amount spent in food and drink sectors, by demographics, January 2016

Flavoured water has an inherently unhealthy image but this could be reversed if flavours are sourced naturally
Looking for category-fused options
Interest in demographic-specific soft drink products

Alcoholic Drinks Out of Home

What you need to know
What we think
Wine and beer growth help on-trade consumer expenditure
Figure 31: Consumer expenditure on alcoholic drinks out of home, 2010-15

Aspiration for high-quality products and sociable lifestyles will drive future growth
Figure 32: Best- and worst-case forecast value sales of the alcoholic drinks out of home, at current prices, 2010-20
Winners for 2016
Losers for 2016
Key consumer findings
Majority spent about the same on on-trade alcoholic drinks compared with last year
Dining out and entertaining are key drivers for alcoholic drinks out-of-home consumption
Lack of category competitiveness according to consumer segmentation and targeting

Alcoholic Drinks In Home

What you need to know
What we think
E-commerce helps off-trade consumer expenditure
Figure 33: Consumer expenditure on alcoholic drinks in home, 2010-15

Aspiration for category premiumisation and shopping habits of convenience will drive future growth
Figure 34: Best- and worst-case forecast value sales of the alcoholic drinks in home, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Consumers have increased spending priority and switched shopping habits online
Price comparison and brand loyalty are key drivers for upgraded consumption and spending

Beauty and Personal Care

What you need to know
What we think
The beauty sector is resistant to economic slowdown
Figure 35: Chinese beauty and personal care expenditure, 2010-15

Booming mobile shopping will support future growth
Figure 36: Best- and worst-case forecast for beauty and personal care, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Spending on beauty remains strong
Women love to reward themselves with beauty goodies
The contrast between the lowest income and highest income groups presents great opportunities for the beauty market
Take a holistic approach of beauty

OTC and Pharmaceuticals

What you need to know
What we think
Widening access and big health awareness fuel growth
Figure 37: Chinese OTC pharmaceuticals expenditure, 2010-15

The aging population will continue to fuel future growth
Figure 38: Best- and worst-case forecast for OTC pharmaceuticals, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Spending on health stands strong
Healthcare services have great potential amongst women
Consumers show awareness of the importance of both mental health and body health

Clothing and Accessories

What you need to know
What we think
Greater competition as consumers go casual
Figure 39: Chinese clothing & accessories expenditure, 2010-15
Aspiration for healthier and trendier lifestyles will drive future growth
Figure 40: Best- and worst-case forecast for clothing & accessories, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Consumers have spent more on clothing and accessories than any other segment
Clothing and accessories the leading self-reward purchase type
Menswear buying veering towards more stylish looks

Household Care

What you need to know
What we think
A steadily-growing market thanks to the increasing number of households
Figure 41: Chinese household care expenditure, 2010-15
Consumers’ evolving living standards will drive future growth
Figure 42: Best- and worst-case forecast for household expenditure, at current prices, 2010-20

Winners for 2016
Losers for 2016
Key consumer findings
Opportunity for imported and premium household care products
Females no longer the sole target of household care products

Technology and Communications

What you need to know
What we think
Steady growth within the technology and communications sector
Figure 43: Chinese technology and communication expenditure, 2010-15
Steady growth expected in the next five years

Winners for 2016
Losers for 2016

Key consumer findings
Consumers are spending more on technology and communication
No significant difference across tier one, two and three cities
The premiumisation of technology products
The rise of domestic brands

Leisure and Entertainment

What you need to know
What we think
Evolving spending priorities drove leisure spending in recent years
Figure 45: Chinese leisure and entertainment expenditure, 2010-15

Cultural sophistication will drive future growth
Figure 46: Best- and worst-case forecast for leisure and entertainment expenditure, at current prices, 2010-20

Winners for 2016
Losers for 2016

Key consumer findings
Consumers prioritising spending on leisure and entertainment
Increased frequency of taking part in out-of-home leisure and entertainment activities
Consumers would like to be connected rather than alone during leisure time
Leisure activities targeting families are popular
Consumers getting used to pay for virtual leisure products

Home

What you need to know
What we think
E-commerce helps to trade up home expenditure
Figure 47: Chinese home expenditure, 2010-15

Aspiration for healthier and trendier lifestyles will drive future growth
Figure 48: Best- and worst-case forecast for home expenditure, at current prices, 2010-20

Winners for 2016
Losers for 2016

Key consumer findings
Consumers deprioritise trading up in household appliances
Increased varieties bought and upgraded consumption are key drivers for household appliance spending
Home furnishing rises to be amongst the most popular online shopping product categories
Affluent households are more likely to buy household appliances online

Transport
What you need to know

What we think

The growth of transport market slows down due to decreasing demand for new passenger cars

Chinese enthusiasm for cars will drive future growth

Figure 49: Chinese transport expenditure, 2010-15

Figure 50: Best- and worst-case forecast for transport, at current prices, 2010-20

Winners for 2016
Losers for 2016

Key consumer findings

Running errands for family and daily-commuting are the top two reasons for first car purchase
Safety is the top reason pushing consumers’ car replacement behaviour
People have high purchase intentions when it comes to new energy cars

Holidays

What you need to know

What we think

Great demanding on travelling still needs to be meet

Outbound travelling will drive future growth

Figure 51: Chinese holiday expenditure, 2010-15

Figure 52: Best- and worst-case forecast for holiday expenditure, at current prices, 2010-20

Winners for 2016
Losers for 2016

Key consumer findings

Holidays as a reward
Growing family travellers
Love for local cuisines continue

Personal Finance and Housing

What you need to know

What we think

Life insurance boosts growth

Mild growth for the coming years

Figure 53: Chinese personal finance and housing expenditure, 2010-15

Figure 54: Best- and worst-case forecast for personal finance and housing, at current prices, 2010-20

Winners for 2016
Losers for 2016

Key consumer findings

Insurance products are not only a protection but also a financial tool
Increased adoption of financial tools
Rising of financial products
The Chinese Consumer - China - April 2016

Miscellaneous

What you need to know

What we think

To-your-door consumer services booming

Figure 55: Chinese miscellaneous expenditure, 2010-15

Aspiration for healthier and trendier lifestyles will drive future growth

Figure 56: Best- and worst-case forecast for miscellaneous expenditure, at current prices, 2010-20

Winners for 2016

Losers for 2016

Key consumer findings

Smartphone-based consumer services apps market booming

Elderly care services likely to grow strongly in coming years
