Chinese consumers have developed hierarchical needs for breakfast. Besides the basic needs for satiety and nutrition, people are willing to trade up to products and services that can help them save time and add convenience to the eating process. Meanwhile they have started looking for super ingredients with energy-boosting functions.”

– Laurel Gu, Director of Research: Food & Drink, Lifestyle

This report looks at the following areas:

- Opportunity for promoting cereal products on breakfast menus
- Opportunity for marketing energy ingredients in breakfast foods
- Fun and entertaining breakfasts during weekends

China’s breakfast market is worth over RMB1.3 trillion in 2015, and is expected to continue with steady growth over the next five years. Besides the basic food safety, satiety and nutritional needs, Chinese consumers are now paying more attention to convenience of preparation and eating, extra functional benefits as well as the in-store dining atmosphere.

Meanwhile the competition is also fierce across sectors. Those who are able to quickly adapt to consumers’ evolving breakfast preferences and cater to their emerging needs will be future winners.

**Premium breakfast delivery services targeting high spenders**

**Slow breakfast at weekends**

**Breakfast bags**

**Promoting local breakfast culture**
The Consumer – What You Need to Know

Elders, low earners and consumers in lower tier cities are more likely to eat breakfast at home
Out-of-home breakfast vendors compete in different price ranges
Western breakfast foods are gaining momentum amongst higher earners
Energy food, convenient on-the-go format and premium weekend breakfast are potential future trends

Breakfast Consumption Frequency

- Older people and low earners are most likely to eat breakfast at home
  Figure 32: Breakfast consumption frequency, April 2016
- High earners go to fast food chains and coffee shops more often
  Figure 33: Percentage of consumers who eat at out-of-home breakfast venues at least 2-3 times a week, by monthly personal income, April 2016
- Convenience stores and bakery houses are particularly popular amongst those aged 25-29
  Figure 34: Percentage of consumers who eat at out-of-home breakfast venues at least 2-3 times a week, by age, April 2016
- Consumers in tier one cities eat at home less, and at breakfast stalls and convenience stores more often
  Figure 35: Percentage of consumers who eat breakfast at least 2-3 times a week, by location, Tier one cities, 2013 vs 2016

Breakfast Spending

- In-home breakfast saves at least 30% as compared to eating out
- Bakery houses and fast food restaurants compete within the higher price tier
- Convenience stores sit somewhere in between
- Coffee houses occupying the high-end segment
  Figure 36: Breakfast spending, April 2016

Preferred Breakfast Foods

- Chinese breakfast foods remain most popular
  Figure 37: Preferred breakfast foods, April 2016
- Consumers going for healthier breakfast foods
  Figure 38: Preferred breakfast foods (selected), by age, April 2016
- Western breakfast food is particularly appealing to high earners
  Figure 39: Types of Western breakfast foods preferred, by monthly personal income, April 2016

Perceptions towards Chinese and Western Breakfasts

- Consumers prefer Chinese breakfasts to Western breakfasts
  Figure 40: Perceptions towards Chinese and Western breakfasts, April 2016
- “Convenient for on-the-go” is the only perceived advantage of Western breakfast foods
  Figure 41: Examples of healthy cereal bars fitting for breakfast consumption, overseas, 2014-15
- Higher earners are more in favour of Western breakfasts
  Figure 42: Percentage of consumers who like Chinese/Western breakfast, by demographics, April 2016

Ideal Packaging for Breakfast Cereals

- Cartons and portable sleeves are the preferred packaging types
