“The recent rapid expansion of the renewables sector is set to slow following a series of policy changes. More established technologies, such as solar PV and onshore wind, are most severely affected. The offshore wind sector remains positive with a strong development pipeline. However, the political uncertainty introduced by Brexit has cast a shadow over future UK offshore wind investments.”

– Claudia Preedy - B2B Analyst

This report looks at the following areas:

- How do government policies shape the development of the renewable energy market?
- What is the potential impact of Brexit on the UK renewable energy sector?
- What is the product mix of renewable energy deployment?
- How have key players involved in the renewable energy sector performed in recent years?
- What is the anticipated future development of the renewable energy sector?

The terms of reference for this report concern the UK renewable energy market. This covers:

- Biogas from anaerobic digestion
- Biomass
- Hydro electric
- Tidal power
- Wind power
- PV cells
- Landfill gas
- Sewage gas
- Wave power

This report is part of a series of reports, produced to provide you with a more holistic view of this market.
The market
A quarter of the UK’s electricity supply now comes from renewable sources
Figure 1: UK renewable penetration of electricity supply, 2011-15
Solar PV overtakes onshore wind to become renewable technology with the largest installed capacity
Figure 2: UK renewable energy market shares, by installed capacity, 2011 and 2015
Recent rapid expansion of the renewables sector is set to slow
Figure 3: Forecast renewable energy generation, 2014-19

Market factors
Companies
What we think

Key Insights
What is the potential impact of Brexit on the UK’s renewable energy policy and the solar PV sector?
What is the current outlook for the UK solar PV market following the recent policy reset?
How is the offshore wind sector progressing in bringing down costs?

Imports
Exports

Market Factors
Renewable Energy - UK - October 2016

Key points

Government policy
EU Renewables Directives
Climate Change Act 2008
Brexit vote raises uncertainties for renewables industry, though the government remains committed to tackling climate change
Renewable Energy Obligation (RO)
RO support closes early for onshore wind and new solar
Feed-in-Tariffs (FITs)
The Renewable Heat Incentive
Electricity Market Reform (CfD and Capacity Market)
Contracts for Difference (CfDs)
Capacity Market (CM)

Market Size Overview

Key points
Overview
Figure 9: Analysis of electricity supplied in the UK, by type of fuel used in generation, 2010-15
Figure 10: UK renewable penetration of electricity supply, 2011-15
Figure 11: Renewable electricity generation in the UK, 2010-15
Figure 12: UK renewable energy market shares, by installed capacity, 2011 and 2015

Wind Generation

Key points
Overview
Figure 13: UK onshore and offshore wind energy generation capacity, 2011 and 2016
Onshore wind
Figure 14: Cumulative FIT wind installations, 2010-16
Offshore wind
Offshore wind costs falling fast
Green Investment Bank drive to boost investment in offshore wind
Turbine sizes are increasing
Wind generation capacity and generation
Figure 15: UK wind energy capacity, 2011-16
Figure 16: UK Wind Energy Generation, 2011-16
Figure 17: UK wind energy capacity, by country 2012-16
Figure 18: UK wind generation development pipeline, as of August 2016

Shoreline Wave/Tidal Generation

Key points
Overview
Swansea Bay tidal energy scheme given go-ahead but future depends on outcome of government review
Wave energy developers’ focus remains on technology demonstration activities, optimisation and cost reduction

Figure 19: UK wave energy capacity and generation, 2011-16
Figure 20: UK wave and tidal capacity in development pipeline, as of August 2016

Photovoltaic Generation

Key points
Overview
Government slashes financial support for solar PV sector

7GW installed capacity across 843 solar farms operational

Figure 21: Photovoltaic capacity installed in great britain, by type, 2011-16
Figure 22: UK photovoltaic electricity capacity and generation, 2011-16
Figure 23: Photovoltaic installations in the UK, by capacity of installation, 2010-16
Figure 24: Photovoltaic installations in the UK, by accreditation scheme 2010-16

Forecast

Key Points
The market
Government policy
Lack of clarity and frequent policy changes have created investment uncertainty in renewables
Market prospects
Overview
Progress in developing renewable energy sector
Recent rapid expansion of renewables sector set to slow, though infrastructure project pipeline remains healthy

Energy storage to play key role in transition to clean electricity supply system

Renewables capacity development pipeline
  Figure 74: Renewables capacity development pipeline, as of August 2016
  Figure 75: Forecast renewable electricity generation, 2015-25

Future potential energy mix
National grid’s future energy scenarios
  Figure 76: Forecast power generation installed capacity under "slow progression" scenario, by source, 2016-40
  Figure 77: Forecast power generation installed capacity under "gone green" scenario, by source, 2016-40
  Figure 78: Forecast power generation installed capacity under "no progression" scenario, by source, 2016-40
