"The wearable technology category has seen advancements in recent years, increasing the repertoire of features and utility. While there are some consumers who make use of their wearable devices daily, others are not convinced that they can find use in such devices and thus avoid ownership."

- Andrew Zmijak, Research Analyst, Consumer Behaviour

This report looks at the following areas:

- Attracting older consumers
- Most non-owners find no use for wearable tech
- Many feel most smartwatches are overpriced

This report focuses on wearable technology, which includes the following devices: fitness-tracking bands, clips and ear buds, smartwatches and GPS watches and wearable cameras (also known as action/POV cameras).
Wearable Technology - Canada - November 2017

Executive Summary

The issues

Attracting older consumers
Figure 1: Wearable device: ownership and intent to purchase, 18-44s vs over-45s, August 2017

Most non-owners find no use for wearable tech
Figure 2: Reasons for non-ownership of wearable technology, August 2017

Many feel most smartwatches are overpriced
Figure 3: Attitudes towards wearable technology, August 2017

The opportunities

Owner behaviours can differ by gender
Figure 4: Fitness tracker owner behaviours, men vs women, August 2017

Smartwatch owners employ their device
Figure 5: Smartwatch owner behaviours – Usage, August 2017

Women see wearables as health awareness tools
Figure 6: Attitudes towards wearable technology, men vs women, August 2017

What it means

The Market – What You Need to Know

Time constraints can affect ownership
Younger groups will boost growth
Financial concerns can lead to cautious spending

Market Factors

Time constraints can impact ownership
Younger cohorts will aid growth
Figure 7: Projected trends in the age structure of the Canada population, 2014-19
Monetary concerns can lead to cautious spending habits

Key Players – What You Need to Know

Promoting the latest and greatest wearables
Variety in wearable tech bands
Interest in wearable tech is unmistakeable
Some brands experiencing difficulties
Tech embedded in jewellery

What’s Working?
Interest in wearable tech is palpable

What’s Struggling?
Some brands are lagging behind
Major barriers include cost and usefulness

What’s Next?
The number of “connected devices” will likely increase
Tech embedded in jewellery

The Consumer – What You Need to Know
A third of consumers own wearable tech
Most don’t own wearable tech as they find no use for it
Fitness tracker and smartwatch owners make use of their devices
Many consumers believe that most smartwatches are overpriced
Men more critical of wearables

Wearable Device Ownership and Intent to Purchase
A third of Canadians own wearable technology
Figure 14: Wearable device ownership and intent to purchase, August 2017
Figure 15: Wearable devices: ownership and intent to purchase, 18-44s vs over-45s, August 2017
