“The continued development of more functional kitchen rolls is a threat to household essentials like cloths and sponges. Adding extra benefits, such as antibacterial properties or the ability to use without chemical detergents, as well as replicating the convenience of kitchen rolls, is likely to be key to the success of household cleaning equipment specialists.”

– Richard Hopping, Senior Household Analyst

This report looks at the following areas:

- Robotics can be the future
- Water-only products to grow in prominence
- The impact of natural cleaning products

Household cleaning equipment may not be the most glamorous product category, but it is a category that is almost universally used by consumers. Nine in 10 use sponge scourers, eight in 10 use scouring pads, and the same proportion use all-purpose cloths. Despite these high usage levels, value sales of products in the household cleaning equipment category had remained stagnant between 2013 and 2016. However, the market returned to growth in 2017, and is now worth an estimated £288 million.

One of the biggest challenges facing brands in this category is the continued development of more functional kitchen rolls. Brands offering specific cleaning equipment are likely to need to add extra benefits, such as antibacterial properties or the ability to clean without chemical detergents, while replicating kitchen roll’s convenience.

Household Cleaning Equipment - UK - February 2018

The Market – What You Need to Know

- Value sales increase slightly for first time in five years
- Value sales of scouring and floor cleaning products have increased
- Majority of sales through grocery multiples
- Amazon Prime proving attractive to parents
- The kitchen receives most frequent cleaning attention
- Population and household growth will boost opportunities

Market Size and Forecast

- Value sales increase slightly for first time in five years
  - Figure 11: UK retail value sales for household cleaning equipment*, at current and constant prices, 2012-22
- Slow growth expected to continue
  - Figure 12: Best- and worst-case forecast of UK value sales of household cleaning equipment*, 2012-22
- Forecast methodology

Market Segmentation

- Scouring products experience increase in value sales
  - Figure 13: UK retail value sales of household cleaning equipment*, by segment, 2015-17
- Value-added products can help boost spend
  - Figure 14: Examples of scouring products with non-scratch claims, 2016-17
- Adspend boosts floor cleaning value sales
- Functionality and versatility of kitchen roll dents cloths and sponges segment
- Enticing consumers back to reusable cloths and sponges
- Gloves segment takes a tumble
  - Figure 15: Leading claims on hand dishwashing product launches, by top claims for 2017, 2016-17
- Growth in eco-friendly detergents will continue to affect glove sales
- Dusters and dusting sticks

Channels to Market

- Majority of sales through grocery multiples
  - Figure 16: Retail value sales of household cleaning equipment, by outlet type, 2015-17
- Discount/pound stores growing in influence
- Amazon Prime proving attractive to parents

Market Drivers

- The kitchen receives most frequent attention
  - Figure 17: Frequency of cleaning tasks, August 2017
- Parents likely to clean the house for longer
  - Figure 18: Time spent personally cleaning the home in a typical week, by parents of under-18s and other, August 2017
- Older generations drive growing population
