

Commercial Mortgages - UK - July 2018

Report Price: £995.00 | \$1343.55 | €1119.77

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Commercial borrowing levels recovered in 2017, bolstered by a strong second half of the year, as the market displayed resilience a year on from the lull that followed the EU referendum. This growth came as a surprise to many in the industry given the climate of uncertainty, with fears that heightened caution could subdue major financial commitments for a number of years.”
- **Marco Amasanti, B2B Analyst**

This report looks at the following areas:

- **Brexit uncertainties**
- **Decline of retail**

The commercial mortgages market regained some stability in 2017 after a significant decline in 2016, reflecting the immediate uncertainty introduced by the UK's decision to leave the EU in June that year. The recovery in 2017 was underpinned by a strong second half to the year, with bolstered interest in commercial property, particularly in the offices and industrial sector.
