The hot and cold cereal category continues to experience consistent declines, hitting a five-year sales low of $10.3 billion in 2019 following a modest 1% decrease from 2018."

- Kaitlin Kamp, Food & Drink Analyst

This report looks at the following areas:

- Cereal sales continue to decline
- Non-parents less engaged in the category
- Consumers' health expectations at breakfast may be unattainable for the category

The cold segment dominates cereal sales, and its performance largely influences category success or lack thereof, to no avail of hot cereal's stability. Growth in the category will rely on moving past the breakfast occasion, embracing indulgence where applicable and holistic wellness innovation in less-indulgent segments.

What’s Next?
The Consumer – What You Need to Know

Maintaining consumption in adulthood a challenge
BFY eating hurts and helps cereal consumption
Expanding cereal occasions
Sweetened cereal’s unhealthy reputation may not call for action

Types of Hot and Cold Cereal Consumed
Lightly sweetened stands strong in cereal consumption
Parents report increased and broader household consumption
Men and women consume the same, but motivations differ
Consumption changes with age
Millennials aren’t killing cereal, but keep an eye on Gens X and Z
Hispanic households consume more oats

Hot and Cold Cereal Consumption
Cereal still a household staple but frequency falls away
Prevent parents from pulling back
Adult consumption decreases by household size

Change in Hot and Cold Cereal Consumption
More consumers increasing than decreasing consumption
Both hot and cold sweetened cereals see the attrition
High fiber, nutrient-dense cereal making its way into consumers’ diets
Consumption changes vary by age
