

Bakery Houses - China - June 2019

Report Price: £3302.97 | \$4460.00 | €3717.16

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“The bakery house market has registered double-digit growth in recent years, mostly driven by strong willingness for consumption upgrade. Today’s bakery houses are no longer just food providers, but are assuming a greater role in consumers’ social lives.”
– Cici Wu, Research Analyst

This report looks at the following areas:

On the one hand, there is potential for healthier bakery products such as low calorie bread. And indulgence-driven consumption also makes cake the most beloved bakery category. Products that can strike a balance between health and taste such as soft European bread would be innovation in the desired direction.

- **Authenticity can help single item bakeries achieve long term popularity**
- **Explore online and offline synergy to close up consumption cycle**
- **Serving demand for consumption upgrade with healthier bread**
