

Occupational Health - UK - May 2019

Report Price: £995.00 | \$1343.55 | €1119.77

The above prices are correct at the time of publication, but are subject to change due to currency fluctuations.

“Changes in the practice of OH are inevitable because there will continue to be a massive shift in where OH services are provided - in the workplace, large enterprises, public sector organisations, SMEs and among the self-employed. As the economy shows signs of slowing down, OH initiatives that can boost long-term productivity might start to become more common.”

– Lewis Cone, Senior B2B Analyst

This report looks at the following areas:

- OH providers and employers responding to '24/7' working climate
- Employers lack efficient mental health strategies

Recent trends indicate that spending on outsourced services is growing faster than in-house services. This has been attributed to a structural change in the employment sector, with the decline of large manufacturing and former nationalised industries replaced by growth in medium-sized service companies.
