"The market for baby/toddler food and drink remains strong, despite the fact that its principal target audience continues to dwindle. The market in 2019 stood at just under $7 billion, 4% ahead of 2014 total sales. Formula maintains a huge market share lead, though its growth has been minimal."

- William Roberts, Jr, Senior Food & Drink Analyst

This report looks at the following areas:

- A continuing birth dearth
- Homemade remains popular among younger parents
- Toddler food eschewed in favor of regular foods

This report is part of a series of reports, produced to provide you with a more holistic view of this market.
